 <https://github.com/OriginalEthnix>

TECHNICAL SKILLS

Languages: C/C++, JavaScript, Python, Java
Frontend: HTML, CSS, React.js, Tailwind CSS
Backend: Node.js, Express.js
Database: MongoDB, MySQL
Tools: Git, GitHub, VS Code
Core Subjects: Data Structures & Algorithms, Computer Networks, OOP

EDUCATION

B.Tech in Computer Science Engineering (AI & Robotics)
Vellore Institute of Technology (VIT), Chennai
2024-present

Higher Secondary Education
Victor International School, Karnal
2021-2023

Secondary Education
Sanatan Dharam Vidya Mandir, Panipat
2008-2021

CERTIFICATES

- IBM - Introduction to Artificial Intelligence (AI)
- Google Cloud - Introduction to Generative AI
- IBM - Introduction to Software Engineering
- JPMorgan Chase & Co. Advanced Software Engineering Job Simulation – Forage
- Scalar - JavaScript Course With Certification: Unlocking the Power of JavaScript
- NPTEL Online Certificate in Forest and their Management - IIT Kanpur.
- Won 1st prize in Rap Battle by Music Club VITC

HOBBIES

Music Composition & Rap Writing
Event Hosting & Content Creation
Sketching & Painting
Chess, Gymnasium & Sports

SUMMARY

Engineering student specializing in AI & Robotics with experience in full-stack development, IoT systems, and AI-powered applications. Passionate about building scalable tech solutions through hands-on projects, software engineering practices, and continuous learning. Seeking internship opportunities to apply development and problem-solving skills in real-world environments.

PROJECTS (MAJOR 3)

Smart City Infrastructure System

APRIL 2026

- Built an IoT-based smart city monitoring platform integrating ESP32, Arduino, ultrasonic, gas, turbidity, PIR, DHT11, and load sensors.
- AI-powered web dashboard for garbage monitoring, mosquito breeding detection, and drainage leakage alerts using ML-based image analysis.

Tech Stack: Arduino UNO, Machine Learning, ESP32 Microcontrollers, Sensors

UniFixed

MAY 2026

- Developed an AI-powered college decision platform for engineering aspirants.
- Built responsive frontend interfaces and scalable backend architecture.
- Improved accessibility and user experience through optimized UI design.

Tech Stack: React.js, Node.js, MongoDB

GitHub: <https://github.com/OriginalEthnix/UniFixed>

FocusForge

MARCH 2026

- Developed a full-featured productivity web application to help users improve consistency through analytics-driven insights.
- Implemented interactive dashboards, weekly tracking systems, Pomodoro focus timer, progress visualization charts, and goal categorization based on priority and effort levels.

Tech Stack: JavaScript, React.js, MySQL

GitHub: <https://github.com/OriginalEthnix/FocusForge>

EXPERIENCES

Open Source Developer at Nexus Spring of Code (NSoC 2026)

- Claimed GitHub issues on curated projects, wrote code to fix bugs or build features, and submitted pull requests to earn leaderboard points.

Head of Human Resource Department at Fraternity of Young Innovators

- Leading VIT's one of the Largest societies, as Head of Human Resource Department

JPMorgan Chase & Co. Advanced Software Engineering Job Simulation through Forage

- Built and optimized backend services using Spring Boot, Kafka, JPA/Hibernate, and REST APIs while completing JPMorgan Chase & Co.'s Advanced Software Engineering virtual experience program.

Stage Committee Member at Cultural Fest VIBRANCE 2026

- Coordinated stage operations and event logistics, contributing to the successful execution of the college's flagship cultural festival.

Student Coordinator of Workshop on Quantum Deep Learning and AI

- Managed end-to-end coordination of the workshop, strengthening leadership, communication, and event management skills.
